Subject index

absorption, creatine, meat, pharmacokinetics, 147
adolescents, back injuries, physical restraints, 495
adolescents, development, kinanthropometry, multivariate analysis, training, 443
adolescents, female athletes, puberty, sexual maturity, 93
age, confidence interval, sex, time constant, 319
aggressive reputation, bias, decision-making, football, recognition-primed decision model, referees, soccer, sport officials, 991
anaerobic threshold, field test, males, orienteering, performance, 529
analysis, games, performance, performance indicators, 739
anterior cruciate ligament, isokinetic, neuromuscular, strength, torque, 689
anthropometry, magnetic resonance imaging, muscle volume estimation, regional body composition, thigh, 563
anticipation, expertise, implicit learning, perceptual training, tennis, 471
antioxidants, basketball, nutrition, sport, supplements, 353
arm crank exercise, aural temperature, calf temperature, heat storage, recovery, skin temperature, 519
athletes, circadian rhythms, phase adjustment, purification, sportspersons, time zone transitions, 725
athletes, deliberate practice, mental imagery, 137
athletes, dual-energy X-ray absorptiometry, exercise, skeleton, sport, training, 463
athletes, isokinetic, isotonic, velocity-specific, 981
athletics, running, sprinting, 369
augmented information, motor learning, skill acquisition, 793
aural temperature, calf temperature, heat storage, recovery, skin temperature, arm crank exercise, 519

back injuries, physical restraints, adolescents, 495
basketball, nutrition, sport, supplements, antioxidants, 353
bias, decision-making, football, recognition-primed decision model, referees, soccer, sport officials, aggressive reputation, 991
bioelectrical impedance analysis, relative body fat, reliability, skinfolds, underwater weighing, validity, 153
biomechanics, coordination, force, motor control, rowing, rowing crews, 101
biomechanics, feedback, motor learning, rowing, sculling, 783
blood lactate, heart rate, high-intensity running, muscle temperature, sprint performance, time–motion analysis, 861
blood lactate concentration, Greco-Roman wrestling, perceived exertion, work-time profile, 939
body composition, dual-energy X-ray absorptiometry, golf, muscle mass, osteoporosis, 591
body composition, muscle mass, remainder mass, skeletal mass, skin and adipose tissue mass, 717
body composition, percent body fat, sulphur hexafluoride dilution method, underwater weighing, 663
book reviews, 167, 359, 511, 651
Borg scale, exercise intensity, meta-analysis, perceived exertion, 873
boys, breathing control, girls, methods, respiratory sinus arrhythmia, 407
breathing control, girls, methods, respiratory sinus arrhythmia, boys, 407
brisk walking, dose–response, exercise prescription, moderate exercise, post-prandial lipaemia, triglyceride, 961
butterfly, elite swimmers, kinematics, swim turns, 383

calf temperature, heat storage, recovery, skin temperature, arm crank exercise, aural temperature, 519
children, efficiency, electromyography, locomotion, metabolic cost, 451
chi-square tests of significance, discrete events, log-linear models, performance indicators, 829
circadian rhythms, phase adjustment, purification, sportspersons, time zone transitions, athletes, 725
coefficient of restitution, golf ball model, normal impact, one-dimensional, 635
cognition, expertise, heuristics, knowledge, orienteering, planning, 327
comfort, footwear, subjective tests, tennis, 671

predictive, qualitative, quantitative, technique analysis, 813
professional athletes, soccer, doubly labelled water, energy expenditure, physical activity, 391
progesterone, endurance running, immunity, menstrual cycle, 339
proximal-to-distal sequence, trunk, electromyography, overarm throwing, 301
puberty, sexual maturity, adolescents, female athletes, 93
purification, sportspersons, time zone transitions, athletes, circadian rhythms, phase adjustment, 725
pursuit tracking, eye movements, methylphenidate, motor coordination, 201
putting performance, confidence, demand characteristics, outcome imagery, 607

qualitative, quantitative, technique analysis, predictive, 813
quantitative, technique analysis, predictive, qualitative, 813

race-specific speeds, swimming, pacing, 537
recognition-primed decision model, referees, soccer, sport officials, aggressive reputation, bias, decision-making, football, 991
recovery, skin temperature, arm crank exercise, aural temperature, calf temperature, heat storage, 519
referees, soccer, sport officials, aggressive reputation, bias, decision-making, football, recognition-primed decision model, 991
regional body composition, thigh, anthropometry, magnetic resonance imaging, muscle volume estimation, 563
relative body fat, reliability, skinfolds, underwater weighing, validity, bioelectrical impedance analysis, 153
relative power output, uphill cycling, lactate threshold, maximal oxygen uptake, 1001
reliability, skinfolds, underwater weighing, validity, bioelectrical impedance analysis, relative body fat, 153
remainder mass, skeletal mass, skin and adipose tissue mass, body composition, muscle mass, 717
respiratory muscle, cycling, dyspnoea, placebo, 547
respiratory sinus arrhythmia, boys, breathing control, girls, methods, 407
rowing, rowing crews, biomechanics, coordination, force, motor control, 101
rowing, sculling, biomechanics, feedback, motor learning, 783
rowing crews, biomechanics, coordination, force, motor control, rowing, 101
running, sprinting, athletics, 369
running exercise, diurnal variation, interdian variation, oxygen uptake kinetics, 901

sculling, biomechanics, feedback, motor learning, rowing, 783
self-efficacy, golf, pre-competition imagery, 697
self-organization, soccer, sports contest, squash, couplings, dynamical systems, 771
sex, time constant, age, confidence interval, 319
sexual maturity, adolescents, female athletes, puberty, 93

skeletal mass, skin and adipose tissue mass, body composition, muscle mass, remainder mass, 717
skeleton, sport, training, athletes, dual-energy X-ray absorptiometry, exercise, 463
skill, talent identification, youth development, conditioning, fitness, performance, 399
skill, tennis, fatigue, intermittent exercise, 311
skill, visual perception, gaze behaviour, interceptive actions, 187
skill acquisition, augmented information, motor learning, 793
skill acquisition, sport, training, feedback, information technology, 755
skin and adipose tissue mass, body composition, muscle mass, remainder mass, skeletal mass, 717
skinfolds, underwater weighing, validity, bioelectrical impedance analysis, relative body fat, reliability, 153
skin temperature, arm crank exercise, aural temperature, calf temperature, heat storage, recovery, 519
soccer, doubly labelled water, energy expenditure, physical activity, professional athletes, 391
soccer, dynamics, kicking, 293
soccer, sport officials, aggressive reputation, bias, decision-making, football, recognition-primed decision model, referees, 991
soccer, sports contest, squash, couplings, dynamical systems, self-organization, 771
soccer chip, coordination, modelling, 253
sport, supplements, antioxidants, basketball, nutrition, 353
sport, training, athletes, dual-energy X-ray absorptiometry, exercise, skeleton, 463
sport, training, feedback, information technology, skill acquisition, 755
sport officials, aggressive reputation, bias, decision-making, football, recognition-primed decision model, referees, soccer, 991
sports contest, squash, couplings, dynamical systems, self-organization, soccer, 771
sportspersons, time zone transitions, athletes, circadian rhythms, phase adjustment, purification, 725
sprinting, athletics, running, 369
sprint performance, time–motion analysis, blood lactate, heart rate, high-intensity running, muscle temperature, 861
squash, couplings, dynamical systems, self-organization, soccer, sports contest, 771
stadiums, familiarity, home advantage, 969
strength, stretch–shortening cycle, vertical jump, muscle damage, 417
strength, torque, anterior cruciate ligament, isokinetic, neuromuscular, 689
strength, Wingate test, eccentric exercise, fatigue, muscle damage, 951
strength training, time of day, diurnal, peak anaerobic power, peak torque, 929
stretch–shortening cycle, vertical jump, muscle damage, strength, 417
subjective tests, tennis, comfort, footwear, 671
sulphur hexafluoride dilution method, underwater weighing, body composition, percent body fat, 663
supplements, antioxidants, basketball, nutrition, sport, 353
swimming, ergometer, power output, 975
swimming, pacing, race-specific speeds, 537
swim turns, butterfly, elite swimmers, kinematics, 383

talent identification, youth development, conditioning, fitness, performance, skill, 399
task, ego, motivation, negative thinking, 707
task cohesion, task performance, group and individual analysis, 119
task constraints, eye–hand coordination, frequency locking, 171
task performance, group and individual analysis, task cohesion, 119
technique, golf, injury, posture, 599
technique analysis, predictive, qualitative, quantitative, 813
temporal, match analysis, pattern, performance, 845
temporal patterning, competitive anxiety, direction, frequency, intensity, 911
tennis, anticipation, expertise, implicit learning, perceptual training, 471
tennis, comfort, footwear, subjective tests, 671
tennis, fatigue, intermittent exercise, skill, 311
thigh, anthropometry, magnetic resonance imaging, muscle volume estimation, regional body composition, 563
time constant, age, confidence interval, sex, 319
time–motion analysis, blood lactate, heart rate, high-intensity running, muscle temperature, sprint performance, 861
time of day, diurnal, peak anaerobic power, peak torque, strength training, 929
time zone transitions, athletes, circadian rhythms, phase adjustment, purification, sportspersons, 725
torque, anterior cruciate ligament, isokinetic, neuromuscular, strength, 689
training, adolescents, development, kinanthropometry, multivariate analysis, 443
training, athletes, dual-energy X-ray absorptiometry, exercise, skeleton, sport, 463
training, feedback, information technology, skill acquisition, sport, 755
tributes, 79, 853, 1009

triglyceride, brisk walking, dose–response, exercise prescription, moderate exercise, post-prandial lipaemia, 961
trunk, electromyography, overarm throwing, proximal-to-distal sequence, 301
trunk movement, Vicon system, digitizing error, marker movement, 507

underwater weighing, body composition, percent body fat, sulphur hexafluoride dilution method, 663
underwater weighing, validity, bioelectrical impedance analysis, relative body fat, reliability, skinfolds, 153
uphill cycling, lactate threshold, maximal oxygen uptake, relative power output, 1001

validity, bioelectrical impedance analysis, relative body fat, reliability, skinfolds, underwater weighing, 153
velocity-specific, athletes, isokinetic, isotonic, 981
verbal encouragement, exercise, lactate, maximal oxygen uptake, 345
vertical jump, muscle damage, strength, stretch–shortening cycle, 417
Vicon system, digitizing error, marker movement, trunk movement, 507
video, feedback, golf swing, learning, 615
visual perception, gaze behaviour, interceptive actions, skill, 187
visual search, emotions, eye movements, gaze behaviour, 237
visual search patterns, external focus of attention, modelling, movement dynamics, 271

Wingate test, eccentric exercise, fatigue, muscle damage, strength, 951
Wingate test, women, lactate, maximal oxygen uptake, multiple regression, 681
women, lactate, maximal oxygen uptake, multiple regression, Wingate test, 681
work-time profile, blood lactate concentration, Greco-Roman wrestling, perceived exertion, 939
